

February 24, 1975

Mr. Tom Crumpton  
Independent Waste Systems, Inc.  
P. O. Box 8206  
Merrillville, Indiana 46410

Dear Mr. Crumpton:

Re: Approval of Disposal of  
Union Carbide's Dripolene  
at the Gary Land Development  
Sanitary Landfill, Lake County

You are hereby notified that approval is granted for the disposal of 4 to 5 truck loads of dripolene on a weekly basis at the Gary Land Development Sanitary Landfill for a period of six months.

You are advised that you must be in compliance with Regulation SPC-17 relative to holding a valid industrial waste hauler's permit. To our knowledge the deadline for submitting an application for a waste hauler's permit is April 1, 1975.

Approval is granted for the disposal of the subject waste with the following conditions:

1. That the dripolene be hauled only to the Gary Land Development Sanitary Landfill.
2. That the dripolene be mixed with the municipal solid wastes and all wastes be covered daily.
3. That, should nuisance or pollution conditions be created by the disposal of this waste dumping must cease immediately and corrective action be taken.

Very truly yours,

Roland P. Dove, Director  
Division of Sanitary Engineering
